

Serial No.: 10/067,119

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 
1. (original) An igniter composition comprising:
a fuel component containing at least about 3 composition weight percent and less than 15 composition weight percent of boron, and
an oxidizer component containing at least one oxidizer material selected from the group consisting of alkali metal nitrates, alkaline earth metal nitrates and mixtures thereof,
wherein the fuel component and the oxidizer component are present in stoichiometrically balanced amounts.

2. (original) The igniter composition of claim 1 wherein:
the fuel component additionally contains at least one fuel material that produces gas on reaction with the at least one oxidizer material.

Serial No.: 10/067,119

3. (original) The igniter composition of claim 2 wherein the at least one fuel material that produces gas on reaction with the at least one oxidizer material comprises guanidine nitrate.

 4. (original) The igniter composition of claim 3 comprising less than about 60 composition weight percent guanidine nitrate.

5. (original) The igniter composition of claim 4 comprising:
at least about 20 composition weight percent guanidine nitrate and no more than about 40 composition weight percent guanidine nitrate.

6. (original) The igniter composition of claim 1 wherein the at least one oxidizer material is potassium nitrate.

7. (original) The igniter composition of claim 6 wherein potassium nitrate is present in a concentration of at least about 40 composition weight percent and no more than about 85 composition weight percent.

Serial No.: 10/067,119

8. (original) The igniter composition of claim 7 wherein the fuel component additionally contains at least about 8 composition weight percent guanidine nitrate and less than about 60 composition weight percent guanidine nitrate.

9. (original) The igniter composition of claim 8 wherein:
the oxidizer component contains at least about 55 composition weight percent and no more than about 75 composition weight percent of potassium nitrate and

the fuel component contains,
at least about 7 composition weight percent and less than about 10 composition weight percent of boron; and
at least about 20 composition weight percent and no more than about 30 composition weight percent of guanidine nitrate.

10. (original) The igniter composition of claim 1 containing less than about 10 composition weight percent of boron.

Serial No.: 10/067,119

11. (original) An occupant restraint system device comprising a housing containing a supply of reactant material, the reactant material including a fuel component containing at least about 3 composition weight percent and less than 15 composition weight percent of boron, and an oxidizer component containing at least one oxidizer material selected from the group consisting of alkali metal nitrates, alkaline earth metal nitrates and mixtures thereof, wherein the fuel component and the oxidizer component are present in stoichiometrically balanced amounts.

12. (original) The occupant restraint system device of claim 11 wherein the housing additionally contains a supply of gas generant material and wherein upon activation of the device the reactant material reacts to produce ignition reaction products which contact at least a portion of the supply of gas generant material to initiate generation of gas thereby.

13. (original) The occupant restraint system device of claim 12 wherein the supply of reactant material comprises at least about 20% on a weight basis of the supply of reactant material and the supply of gas generant material combined.

Serial No.: 10/067,119

14. (original) A seat belt pretensioner comprising the occupant restraint system device of claim 12.

15. (original) A micro-gas generator comprising the occupant restraint system device of claim 12.

16. (original) The occupant restraint system device of claim 11 wherein the reactant material fuel component contains less than about 10 composition weight percent of boron.

17. (original) The occupant restraint system device of claim 11 wherein the reactant material fuel component additionally contains at least one fuel material that produces gas on reaction with the at least one oxidizer material.

18. (original) The occupant restraint system device of claim 17 wherein the at least one fuel material that produces gas on reaction with the at least one oxidizer material comprises guanidine nitrate.

Serial No.: 10/067,119

19. (original) The occupant restraint system device of claim 18 wherein the reactant material comprises less than about 60 composition weight percent guanidine nitrate.

20. (original) The occupant restraint system device of claim 19 wherein the reactant material comprises:

at least about 20 composition weight percent guanidine nitrate and no more than about 40 composition weight percent guanidine nitrate.

21. (original) The occupant restraint system device of claim 11 wherein the at least one oxidizer material is potassium nitrate.

22. (original) The occupant restraint system device of claim 21 wherein potassium nitrate is present in the reactant material in a concentration of at least about 40 composition weight percent and no more than about 85 composition weight percent.

Serial No.: 10/067,119

23. (original) The occupant restraint system device of claim 22 wherein the fuel component additionally contains at least about 8 composition weight percent guanidine nitrate and less than about 60 composition weight percent guanidine nitrate.

24. (original) The occupant restraint system device of claim 23 wherein:

the reactant material oxidizer component contains at least about 55 composition weight percent and no more than about 75 composition weight percent of potassium nitrate and

the reactant material fuel component contains,
at least about 7 composition weight percent and less than about 10 composition weight percent of boron; and

at least about 20 composition weight percent and no more than about 30 composition weight percent of guanidine nitrate.

Claim 25 (canceled)

Claim 26 (canceled)

Serial No.: 10/067,119

could

27. (new) A seat belt pretensioner comprising the occupant restraint system device of claim 16.

✓

28. (new) A micro-gas generator comprising the occupant restraint system device of claim 16.
